AN ADVENTURE IN CARIBOO

Having in my time wandered over no small part of the globe, and being now laid up in ordinary, it is my chief de-light to toss over the sere and yellow leaves of my memory by the help of travelled visi-tors. Such wayfarers are the most

visit and the reversion, in the matter of pheasants, of my more modern friends' leavings. Those young gentlemen are not satisfied with anything less than twenty brace a day to each gun, but we old stagers are not such epicures—we who know what it is to shoot for our suppers, and to go huncry then. P.'s best steries, I think, hall from the west; though there are few of the parochial divisions of this planet that would not furnish him with a text. But he handles the West as if he loved it, search the berry and glossy leaf or where the paragraph of the handles the West as if he loved it, search the berry and glossy leaf or where for the purpose. The situation was so arranged around his neck that, while he could be nearly and quickly bound, while the one of which Mr. Connor was very one six of the most terriore lide lariats were produced, with in ingentous oaths I ever heard in British one of which Mr. Connor was very one six of the most terriore lide lariats were produced, with ingentous oaths I ever heard in British one of which Mr. Connor was very one six of the most terriore lide lariats were produced, with ingentous oaths I ever heard in British one of which Mr. Connor was very one six of the most terriore lide lariats were produced, with the lariats were produced, with the lariats were produced, with the local of lariats were produced, with the lariats were produced, with the lide lariats were produced, with the lariats we he handles the West as if he loved it, as Izaak Walton bade us handle the frog. He is at home anywhere there; on the prairies, the Bocky mountains, the Pacific coastfrom Alaska to Panama. On the evening which I will take as an epoch to start with our party con-sisted of a certain chancery barrister, who shot well, drank fair, and had the sometimes provoking gift of summing up the merits of one of our tales of outland with a judicial neatness often not to be anticipated from their wild ingredients; the parson of the parish who, might sometimes, I fancy, have preferred whist, short or even long, to our everlasting travellers' tales; P. and myself.
We had been conversing on the sub-

ject of flies. Our remarks had been severe on those works of nature, and devoid of any shade of Brahminical charity. Their splendid impudence had been dwelt with, and the Barrister had even cited Mr. Ruskin against them. The Rector had reminded us of the etymology of the title "Beelzebub." I, for my part, though certainly against the grain, had assumed the brief of devil's advocate, and pleaded that some doctors (names unknown) had held that mosquito bites (in quantity unknown) will act (in circumstances not precisely stated) as a prophylactic against fever.

for such a fire-eater! Poor Rector! his bold soul must have mede the air shake over those mealows of aspholed yonder when he realized it and commented there on it in his free fashion!" And P., in the character of Rector's vites saver, here blew out so vast and indignant a volume of smoke that it seemed in the very act of the utterances suggested.

All this was very moving, but we clearly had not yet flushed the story; and the barrister found voice for us by saying dryly. Let us have the case

lumbia. I was a justice of the Peace, and had somewhat indistinct and multifiations duties connected with the maintenance of order generally, and of the gold escort in particular. In the fall of that year I was in the northern and in those days extreme limits of the colony—at the Forks of Quesnelle, to speak by the card—as an early winter began to whisper hoarsely and frostly to the various mining-camps that it was time to be pulling updome-boxes and for pradent tolk to be turning their faces south. Leen who had done well began to tunk of the amenities of the soloons and calliand-halls of Victoria; if very well, they dreamed of even Trisco as a place of hybernation; while men who had been avoided by the quick wings of fortone were fain to balance the prospect of taking the clown for the safe and tree-martnes.

That a man should lose his life through mispronunciation of a vowe seems hard, but such really was the fact. In the year 1718 Williams—a Welsh actor-and Quin were playing together at the Lincoln's Inn Fields Theatre in the tragedy of "Cato." Williams playing Decius to Quin's Cato. The former entered with "Casar sends health to Cato," but he mineingly pronounced the name of Cata Feeto. Quin, who gave a broad classical enunciation to the letter a in the world was offended, and instead of replying "Could be send it to Cato's slaught refriends it would be welcome, ' he ex-charact, "Would be had sent a better messenger." The gold panned out well and Dave's ill luck, in the share of all sides of the bouse. When they met in the green-room Williams at sailed Quin for rendering him ri hen Cuin said it was in the cars, and would have laughed off the matter but the spirit of the Welshaarn rest. The work of the wels

was arouted and would not brook such treatment, and so he lay in wait for Cato beneath the piazza of Covent Garden. Quin laughed as Williams drew his sword and bade him defend hin.self, and would have sustained his defence with his cane; but the Welshman thrust so fiercely that the other was obliged to draw his sword, which, without intention on the part of the wielder, passed through the body of Decius and stretched him dead upon the pavement.

STARVATION IN LABRADOR. A Missionary's Thrilling Narrative of the People's Terrible Suffering.

A Helifax (N. S.) special says: Rev Frenk W. Colley, missionary at Labra-dor, has written a letter giving a graphic recount of heart-rending destitution prevailing there. He has tra-velled the whole coast and declares the words cannot describe the sufferings of the poor. He tells of families of he mad, and the poor wretch had been trying to eat his own boots. The pan desperate straits that wives mothers even had to sell their wedding rings for bread. At Grady's, Stable Fay, Rocky Eny, Spotted Island, and Scal Island whole families were slowly starving in January. How they existed through the winter God only knows. The scanty aid sent by the Newfoundland Government was distributed before half the winter was over. Mr. Colley declares that only fear of a repetition of the terrible sufferings induces him now to make the terrible facts pub The missionary concludes a three-

column narrative by demanding in the name of humanity that the Newfound-land Covernment immediately send relief to that district, and also provide means for transporting the wretch

a day per man.
